SUMMARY

A Developer at HCLTech with 4 years of industry experience, currently working on a Microsoft client project, focusing on validating AI-driven features across Microsoft platforms.

Began my journey as an intern at HCLTech working for the project client 'Commonwealth Bank of Australia' and transitioned into a full-time Software Engineer role within the same project, gaining experience in mainframe technologies like COBOL along with exposure to Java applications.

Outside of technology, I actively engage in Football, Chess, Sudoku and Snooker. I also am a trained Carnatic Classical music Vocalist.

I bring strong problem-solving abilities, adaptability, attention to detail, collaboration, and effective communication to my work. With this blend of technical and interpersonal strengths, I am actively working towards progressing into leadership roles.

WORK EXPERIENCE

HCLTech

Intern | Chennai, Tamil Nadu

Apr 2022 - Aug 2022

- Completed an internship at HCLTech working for the project of Commonwealth Bank of Australia, focusing on Mainframe systems.
- Developed and presented a fully working web project of HRMS demo with a DB2 database at the end of the internship.

Software Engineer | Chennai, Tamil Nadu

Aug 2022 - Mar 2025

- Worked as a Software Developer/Support Engineer, focusing on batch processing of jobs for the project of Commonwealth Bank of Australia.
- Managed and supported various bank applications, including Passbook Systems, Home Loan applications, Online Interfaces, and Personalized Book systems.

QA Specialist/Developer | Bengaluru, Karnataka, India

Mar 2025 - Present

- Spearheaded validation for 15+ critical AI features across 8 different Microsoft platforms, ensuring quality and reducing post-release defects.
- Part of the Copilot Team which looks into the testing and QA of different AI integrated, Agentic and MCP Server Agents.
- Orchestrated cross-functional test cycles with 5+ engineering teams, accelerating release readiness by 15% for key AI product updates.
- Focusing on system behavior analysis, debugging, and validation of server-tool interactions.
- Validate and test the apps presented by the developers based on the Microsoft app validation guidelines.
- Collaborate with client stakeholders to analyze defects, clarify requirements, and validate fixes in enterprise-scale environments.
- Complex AI models demanded advanced validation > Engineered custom testing methodologies and tools > Boosted test coverage by 20%.
- Optimized test suites for Microsoft 365 Hubs using tools like Unified Testing Tool, enhancing stability for our users and reducing critical bug exposure Software Engineer

EDUCATION

BSc, Designing and computing

Nov 2022 - Nov 2026

BITS Pilani Work Integrated Learning Programmes

Higher Secondary Education, Bio-Math Science

Jun 2019 - Apr 2021

St. Michael's Anglo Indian Higher Secondary School

SKILLS

- AI Prompting
- LLM, MCS/MCP & Agent365 Testing, Software Testing
- Python (Programming Language), NumPy, Pandas
- Figma (Software)
- MySQL
- Microsoft Excel

CERTIFICATIONS

- AI & Automation of MS Excel
- Basic to Advanced SQL Certification
